NYDA JOINS HANDS WITH DJ ZINHLE FOR YOUTH OPPORTUNITY PLACEMENT AT ZEE NATION FESTIVAL

The Zeenation Fest and the National Youth Development Agency (NYDA) are pleased to announce collaboration partnership aimed to providing valuable skills development opportunities, through a hands-on training to the National Youth Service participants, under the Presidential Youth Employment Intervention. This partnership seeks to empower young people by offering them experience in planning and executing a prominent and cultural event celebrating creativity and innovation.

Through the partnership, the NYDA and Zeenation Fest will work together to identify and select a group of dedicated young participants who will assist with various aspects of event management, including logistical coordination, guest services, marketing, and production. These participants will have the opportunity to gain practical skills, network with industry professionals and contribute to the success of the festival.

Both parties are committed to fostering a supportive and enriching environment for the young participants, ensuring that they receive proper training, mentorship, and feedback throughout their involvement in the Zeenation Fest. The NYDA will provide additional support by offering career guidance, resources, and potential networking opportunities to help the participants further their professional development beyond the event.

By working together, the NYDA and the Zeenation Fest aim to create a meaningful and impactful experience for young people, equipping them with valuable skills and knowledge that will benefit them in their future careers. We look forward to a successful collaboration and positive impact it will have on the personal and professional growth of the participants.
